

SARZANA ITALY

INSPIRED BY ARCIMBOLDO

Art is in our hands

We chose Arcimboldo because he is perfect to represent a school project about healthy food called “slow food”. In this project our children have been involved in growing vegetables in the school garden.

They grow different kinds of vegetables like: tomatoes, carrots, cucumbers courgettes, lemons, radishes , herbs etc.....

When they completed their work we showed them famous masterpieces of ARCIMBOLDO and we discussed about the materials used.
